PATENT ATTORNEY

Sir:

An interview was held between Applicants' representative Theodore M. Magee and Examiner Shapiro on August 25, 2006. The §112 rejections of claims 5 and 9 were discussed. It was agreed that the Applicants would amend the specification and claims to better link the display orientation context values found in those claims with the specification and to distinguish the display orientation context values from the tilt context values.

The Examiner also raised the possibility that claims 31-33 should have been restricted from this case and indicated that a restriction requirement would likely be included in the next action. Applicants agreed to electing claims 5, 9, 10, 12 and 14 if the Examiner restricted the case into two groups with group I including claims 5, 9, 10, 12 and 14 and group II including claims 31-33.

No agreement was reached as to the patentability of the claims, but the Examiner stated that he would review claim 5 for patentability.

The Director is authorized to charge any fee deficiency required by this paper or credit any overpayment to Deposit Account No. 23-1123.

Respectfully submitted,

WESTMAN, CHAMPLIN & KELLY, P.A.
